PROFESSIONAL SUMMARY

Full-Stack Developer with **3 years of coding experience** specializing in React, JavaScript, TypeScript, Node.js, Express.js, and MongoDB. Experienced in developing full-stack applications, REST API integrations, authentication systems, real-time features, role-based access control, and Paystack payment integrations. Currently serving as a Tech Lead / Senior Developer at Spectron, where I have led a team of 6–10 developers, assigned tasks, conducted code reviews, and designed developer workflows.

EDUCATION

Lead City University | Ibadan, Nigeria
Bachelor of Science in Computer Science

Expected Dec 2028

RELEVANT EXPERIENCE

Spectron | Lagos, Nigeria (Hybrid)
Tech Lead / Senior Developer

July 2025 – Present

- **Architected and engineered** scalable, full-stack micro-frontends and back-end web solutions for early-stage startup platforms using React, TypeScript, and Node.js.
- **Spearheaded product technology roadmap** and developer workflows, implementing robust authentication, automated deployments, and optimized server-side integrations via MongoDB Atlas.
- **Streamlined development productivity** by integrating modern AI workflow tooling (Cursor, Codex, Claude) to accelerate iteration cycles and ensure high code reliability.

TECHNICAL PROJECTS

Vinov Invoice Generator | Personal Project

2025

- **Engineered a full-featured web platform** enabling users to dynamically create, edit, customize, and manage professional invoices seamlessly.
- **Implemented public view access links** allowing non-authenticated recipients to view read-only versions of invoices securely without requiring account registration.
- **Built with React, JavaScript, Node.js, and MongoDB** to handle real-time state updates, persistence, and secure user account management.

FreelanceX | Independent Project

2025

- **Developed a multi-role freelance platform** supporting distinct workflows for Clients, Freelancers, and Administrators with role-based access control (RBAC).
- **Integrated live interactive features** including a real-time messaging chat system between clients and freelancers, as well as seamless payment processing via Paystack.
- **Leveraged modern full-stack tech stack** to ensure instant order processing, dispute resolution routes, and secure financial transactions.

ADDITIONAL EXPERIENCE

Google Developer Student Club (GDSC) | Lead City University
Active Club Member

2024 – Present

- **Collaborated with student developers** in peer coding workshops, hackathons, and technical sessions focused on open-source software and modern web architecture.
- **Engaged in technical knowledge sharing** surrounding full-stack JavaScript frameworks, backend integration, and cloud development best practices.

SKILLS & TECHNOLOGIES

Programming Languages: JavaScript, TypeScript, HTML5, CSS3, Python

Frameworks & Libraries: React, Node.js, Express.js, Web Animations

Databases & BaaS: MongoDB, MongoDB Atlas, Firebase, Supabase

Tools & AI Workflows: Git, GitHub, Vercel, Paystack Integration, Cursor, Codex, Anti-Gravity, Claude
